

Inventor / Engineer

Inventors are the mechanical hearts of Greedo's infrastructure, but they are far from formal academics. Inventors are scrappy creators of new machines, and engineers are efficient implementers of existing designs. Each become well-versed in taking advantage of sparse resources quickly, and tend to make rather strange creations to match their needs.

Rest Ability

Pick anything related to the building or maintenance of Structures, and swap out resource requirements to any other resource. Inventors may swap SKL resources, and Engineers may swap Knowledge resources.
